Criteria: 2

Metric: 2.6.2: Attainmnet of CO & PO are evaluated:

Our institution believes in the outcome-based learning and therefore all necessary measures are taken to ensure that learners are aware of the outcomes of various Programmes and Courses to which they are enrolled. However mere awareness of the outcomes are not enough as learners need to attain those outcomes stated and circulated before the commencement of the courses/programmes. The institution adopts a number of technology-assisted mechanisms to evaluate the attainments of the outcomes. There are discipline-specific outcomes and students' attainments of these outcomes are evaluated in two ways primarily: a) Direct Method b) Indirect Method

a) **Direct Method**: The result of the Semester-end examinations offers the most direct ways of measuring the attainment of outcomes by learners.

b) **Indirect Method:** The teachers' evaluation of students on the basis of class performance, internal examinations, learners' involvement in various co-curricular activities may help the faculty to evaluate how far the outcomes are attained by learners.

Ordinarily speaking students' performance are evaluated on the supposed understanding of the conceptual clarity to critical thinking. There are primarily five parameters against which students' understanding and learning are evaluated. The learners are evaluated in terms of their grasping of the subject matter, the ability of critical thinking etc. The attainment of outcomes are also evaluated in terms of the number of students enrolling for postgraduate courses as well as qualifying in various public examinations and admission tests.

The weightage of Semester-End examinations and Internal examination together with the evaluation by faculty stands at 80:20
